**Subject:** Suggested replacement for conclusion number 8 - Allied Paper, 2014 groundwater report.

Michael:

As requested during our meeting last Friday in St. Joseph, Michigan, here is the proposed replacement language for conclusion number 8 in the 2014 Allied Paper Landfill Groundwater Report:

*"Based on the data obtained from the perimeter monitoring wells along Portage Creek that, for the most part, monitor the surficial and intermediate water-bearing formations, a migration pathway beneath the central waste mass at OU1 and the downgradient City municipal wellfields screened in the deeper regional aquifer is not currently apparent."*

Please call Mike Wetzel if you have any questions.

I look forward to continued discussions with our groundwater team to develop the proposed long-term monitoring program for OU1 and surrounding areas.

Sincerely,

Rick
